**Potential competing interests:** No potential competing interests to declare.

This is a good article and necessary for the scientific world. However, there is a need for minor revision.

**Abstract:**

1. What does the author mean by "...increasing human health"?
2. The author did not provide the methodology of the literature search in this section.

**Introduction:**

1. It is called "One Health," not "Single Health."

The author should provide a brief history of One Health.

This article lacks a Materials and Methods section: how did the author carry out his/her literature search?

These issues should be resolved.
