

# Review of: "Comparative Study Between the Efficacy of 4% Articaine Infiltration and 2% Lidocaine Nerve Block as Local Anesthetic Agents for Painful Dental Procedures in Children Aged 6-18 Years"

Nitesh Tewari

Potential competing interests: No potential competing interests to declare.

It is a well-conducted study and can be accepted. However, the paper may improve if the following aspects are added-

1. Please provide a clear justification regarding the purpose of conducting this study. This may be defined properly in the introduction.
2. The English language and typographical errors may be addressed in the revision.
3. The authors may use some of the recent systematic reviews in the discussion for comparing their results.
4. The clinical implications of the study must be clarified in the discussion.
5. Some methodological details, such as the basis of sample size calculation, method of randomization, etc., if available, may be provided.
