

Review of: "Does Exchange Rate and Interest Rate Affect Stock Prices in Nigeria?"

Dr S Durga

Potential competing interests: No potential competing interests to declare.

It's totally a very good paper which adds value to the existing literature. The paper is well structured, and presented.

Research gap need to be given clearly. Moreover more research papers need to be quoted in the review which are accessible easily. Author can include more macro economic factors like crude prices, gold prices, GDP which can give a comprehensive picture of the said objective.
