Review of: "Maintaining cyberhygiene in the Internet of Things (IoT): An expert consensus study of requisite user behaviours"

Omar Mohammad[1]

1 Lebanese International University

1. starting with the abstract you mentioned the following "These findings can inform the development of tailored behaviour change interventions to improve cybersecurity." how did you improved it ?

2. "In 2017 an estimated 16.7 million US citizens had a collective $16.8 billion stolen from them by cybercrime," we are in 2023 and you mentioned a prediction from the past years, it should be a real number for 2017 or an estimation for the net coming years like 2030

3. you must describe the difference between qualitative and quantitative data.

4. most paragraph need and illustration or figure to elaborate more abut the concept.

5. when it comes to numbers, you should convert these numbers in to charts to be understood by the readers and help them to identify the result and how the questioner help you reveals the main points and how you worked by the collected data.
