

Review of: "Child and adolescent self-harm in a pandemic world: Evidence from a decade of data"

Francesca Felicia Operto

Potential competing interests: No potential competing interests to declare.

I appreciate the topic of this work, however I have some suggestions to improve your article. First, You should amplify the theoretical background. You write that there is little information on the impact of Covid on mental health, in the literature there are already numerous articles that You can use to deepen your work. There are studies that deepen the impact of covid on the mental health of children and adolescents. You should look for articles to consult that pertain to the impact of COVID pandemic on children and adolescents with neuropsychiatric disorders. Again, add additional sample's information in the text for clarity, for example if there are comorbidities with other neurodevelopmental and psychiatric disorders.

Review the formatting of the article.
