

Review of: "[Perspective] Glucolipotoxicity: A Novel Different Perspective on the Causes of Cancer"

B. Meher Gayatri¹

¹ University of Wisconsin System

Potential competing interests: No potential competing interests to declare.

The concept of the paper is novel and different; however, the authors lack proper data to support the hypothesis.

Few references are mismatched, and the structure of the paper needs to be modified.

Introducing glucolipotoxicity needs more backstory.

Having a graphical summary will help the readers better understand the concept of the paper.
