Dear Author,

I highly appreciate your effort in this article but before considering for publication the following corrections has to be made.

1. In addition to given literature more recent articles should be included.
2. Mathematical modelling has to be explained clearly, only equations are given.
3. Objective function is not so clearly stated, needs explanation.
4. Uniform notation should be used throughout the article and needs explanation.
5. Simulation results are good but needs more clarity.
6. Whether Experimental prototype is possible?
