Dear authors,

Thank you for your precious work.

Abstract

Remove the phrase "researcher-made questionnaire."

It is suggested to use abbreviations correctly in the abstract.

Background

Try to write more structuredly. Try to give a definition for organ transplantation and donation.

A complete language editing in terms of grammar is needed for the background.

Methods

Remove the subheading "research hypothesis" and merge it with the previous subheading.

Merge inclusion and exclusion criteria.

Try to write the process of the educational program more in detail to be more comprehensive for the readers.

Discussion

Remove the following paragraph and merge it into the background section:

"To date, few studies have focused on organ donation in Sirjan and other provinces of Iran. Moreover, there are few studies about using theory-based campaigns to address knowledge, attitude, and behavior related to organ donation."
