Umbilical cord ulceration-intestinal atresia syndrome

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. [Umbilical cord ulceration-intestinal atresia syndrome](#). ORPHA:3405

A rare syndromic intestinal malformation characterized by ulcer formation in the umbilical cord associated with congenital upper-intestinal atresia, typically presenting with intra-uterine hemorrhaging from the ulcer site and subsequent fetal bradycardia.
