I found this review to be very well-written and informative. I learned a lot, given that the author summarized grouper management across the three regions of the SEUSA, not just the region in which I specifically work. The author covered all of the main components of grouper management in a thorough, clear, and organized way. I found the figures to be very clear and useful as well. I had a number of small grammatical suggestions, which are included in the PDF I uploaded. If the comments don't come through on that attachment, please let me know, and I'd be happy to send them another way. Great work, Manuel!

Sincerely,

Dr. Nate Bachelor, NOAA-NMFS
