Review of: "A Perspective for Economic and Social Unfoldings of AI"

Moulay Hachem Alaoui Harouni[1]

1 University Ibn Zohr - Agadir

the paper summarizes the discussed topics and suggests further research directions. The author emphasizes the need for a balanced approach that leverages the benefits of AI while maintaining the importance of critical thinking and human cognitive abilities. The paper overall provides a comprehensive overview of the role of AI in education, covering various aspects and technologies that can enhance teaching and learning processes.

In terms of strengths, the paper offers a clear and structured discussion of the topic, covering multiple relevant areas related to AI in education. The author provides examples and illustrations to support the explanations, making the content more accessible to readers. The inclusion of references and citations adds credibility to the paper and allows readers to explore the discussed topics in more depth.

However, there are a few areas for improvement. The paper could benefit from a more critical analysis of the limitations and potential risks associated with the integration of AI in education. Additionally, providing empirical evidence or case studies to support the claims made in the paper would enhance its impact and practical relevance.

Overall, the paper provides a valuable overview of the role of AI in education, discussing its benefits, limitations, and potential applications. It serves as a starting point for further exploration of the topic and highlights the need for continued research in this area.
