

Review of: "Contextualizing Public Coastal Access Challenges in South Africa, a Review of Best Practices in Selected Countries"

Thiago Gomes Eirão

Potential competing interests: No potential competing interests to declare.

The article is well-written and has many interesting insights about public coastal access. However, there's a lack of data, especially about the years and impact of apartheid on South Africa's public administration. The article would benefit from a longer discussion about legal implements against racial discrimination starting in Mandela's administration.
