Potential competing interests: No potential competing interests to declare.

1. Why should the BMC for the assessment of resilience? What other methods are available and why was this chosen?
In general, the literature review seems incomplete.
2. How do the different aspects of the BMC relate to the different sections of the paper? It is not clear.. Are the different sections recommendations?
3. A good structure needs to be followed in the paper. Right now there is no methodology, results or discussions/limitations which makes it difficult for generalisability.
4. A discussion section should relate to previous academic work. Currently, the paper seems like a project report or a white paper.
