

Review of: "Determinants of Dividend Payouts in Ethiopian Private Banks: A Firm-Specific Analysis"

Mahdi Imanian

Potential competing interests: No potential competing interests to declare.

- I recommend the paper for publication if the following points can be addressed in the revision:
- The manuscript should be checked carefully for any further clerical errors, and English should be improved throughout the text to make it consistent with the journal standard.
- The uncertainty analysis and comparison of the results with others from literature sources are needed to highlight the novelty of the manuscript.
