In relation to the article "Unlocking Natural Capital in the Megadiverse Colombian Pacific Basin: Navigating Challenges and Governance Gaps", an adequate correlation and common thread are identified throughout the text. Likewise, updated references and case studies are demonstrated where the problem addressed is evaluated. The description of the area of influence is interesting, where the location map and description of each of the processes to be addressed during the investigation are evident, making the investigation striking to the reader. The coherence and writing are well written. For the future work, it would be interesting to address a strategy for this lack of knowledge and thus establish an action plan and roadmap for the conservation and preservation of the Colombian Pacific.
