Potential competing interests: No potential competing interests to declare.

The aforesaid research paper is of great interest and has the potential to be accepted for publication if following points are considered:-

1. The conceptual framework is weak. Can be improved by describing the basis and background of the study.
2. The introduction section lacks a clearcut research question. Kindly add it.
3. Variables such as Exchange rate, interest rate, stock prices should be discussed in detail.
4. Due to COVID-19 that happened in 2019-2020, don't you think that it would be advisable to use structural break?
5. I can't find lag values of oil prices. Maybe I missed it but please check.

If these changes are incorporated, I think the manuscript will become suitable for publication.
