

Review of: "The Influence of Hot Extrusion on The Mechanical and Wear Properties of an Al6063 Metal Matrix Composite Reinforced With Silicon Carbide Particulates"

Vijay Kumar Shankar

Potential competing interests: No potential competing interests to declare.

1. Manuscript needs improvement, especially the introduction section with proper problem statements.
2. Experimental investigations are not up to the mark; kindly give the reason behind this procedure and determine the properties.
3. Initially, results need to be explained based on the requirements.
4. Observations need to be explained in detail.
5. All figures can be drawn in Origin so that they will be clear in every way.
6. The abstract and conclusions need correlation so that the reader can understand the problem statement and deliverables.
