# RABEP1/PDGFRB Fusion Gene

National Cancer Institute

## Source

National Cancer Institute. *RABEP1/PDGFRB Fusion Gene*. NCI Thesaurus. Code C99591.

A fusion gene that results from a chromosomal translocation t(5;17)(q33;p13) which fuses most of the RABEP1 gene with the 3' part of the PDGFRB gene. This gene fusion is associated with chronic myelomonocytic leukemia.
