Review of: "Generative Artificial Intelligence Using Machine Learning on Wireless Ad Hoc Networks"

Sakshi Gupta[1]

1 Manav Rachna International Institute of Research and Studies

In this article, the authors try to improve the functioning and performance of the ad hoc wireless network infrastructure with the help of GenAI algorithms. This is a good attempt, and novelty is there. However, the following changes should be incorporated.

1. Check for grammatical mistakes and punctuation.
2. The authors should elaborate on the simulation tool.
3. The authors should compare their work with previous work also.
