

Review of: "Increasing Renewables and Building Retrofit in a Coal-Based Cogeneration District Heating System"

Arunkumar Jayakumar

Potential competing interests: No potential competing interests to declare.

The MS is well drafted; still, there is a lot of scope for improvement in the manuscript.

1-The authors state, "District heating systems supply buildings with heat at a certain temperature"; specify the temperature range.

2-Make a systematic review and establish a research gap.

3-Kindly refer to the paper to gain some insight on the role of energy in sustainable development, as well as the correlation of Environmental Degradation and Economic Growth.
