# Foreign Facility's United States Agent

National Cancer Institute

## Source

National Cancer Institute. *Foreign Facility's United States Agent*. NCI Thesaurus. Code C73330.

A person, partnership, corporation, or association that has a place of business or/and residence in the United States and is physically present in United States, whom a foreign facility designates as its agent. A U.S. agent cannot be in the form of a mailbox, answering machine, or service, or other place where an individual acting as the foreign facility's agent is not physically present. The U.S. agent acts as a communications link between FDA and the facility. FDA will treat representations provided by the U.S. agent as those of the foreign facility, and consider information provided to the U.S. agent as the equivalent of providing the same information or documents to the foreign food facility.
