

# Review of: "When a Cluster Is a Cluster"

Hozan Hamarashid

Potential competing interests: No potential competing interests to declare.

As I uploaded the manuscript with my comments on it.

1- The manuscript structure must be corrected to the following structure:

abstract

introduction

literature review

methodology

results and discussion

conclusion

references

2- There is no literature review in the manuscript.

3- There is no methodology in the article.

4- There is no results and discussion in the article.

5- There is no conclusion in the article.

6- In the article there is no contribution. The contribution must be mentioned clearly.

7- The methodology must be clearly stated in the article.

8- The algorithms and the tests must be declared also their equations and details about using them must be addressed in the article.

the entire article should be corrected.

So, major revision is required.
