Congenital hypothyroidism due to transplacental passage of TSH-binding inhibitory antibodies

INSERM

Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base. Congenital hypothyroidism due to transplacental passage of TSH-binding inhibitory antibodies.*
ORPHA:95715

Congenital hypothyroidism due to transplacental passage of maternal thyroid-stimulating hormone (TSH)-binding inhibitory antibodies is a type of transient congenital hypothyroidism (see this term), a thyroid hormone deficiency that is not permanent.
