

Review of: "[Mini Review] Sinus Bacterial Infections"

Aditi Singh

Potential competing interests: No potential competing interests to declare.

The mini-review on [Sinus Bacterial Infections](#) by Thualfakar Hayder Hasan has some important points on sinus infections; however, it is very superficial without much detailed information. Causative bacterial species need to be mentioned for more clarity. The risk factors, though briefly given, are repeated. Even if it's a mini-review, some statistical and factual data will make the article much more potential and useful.
