**Potential competing interests:** No potential competing interests to declare.

Great concise opinion paper. Overall, the article effectively communicates the importance of immunizing healthcare workers and serves as a timely reminder during World Immunization Week. The article could have benefited from further discussion of the potential barriers to immunization among healthcare workers and strategies to overcome them. Nonetheless, the article effectively underscores the vital role that immunization plays in promoting the health and safety of both healthcare workers and the patients they serve.

The author could consider specifying more clearly the sources of the data in Table 1.

The last sentence could be reformulated to make it clearer. Perhaps, splitting it in two sentences.
