

Review of: "[Commentary] Balancing the bio in a biopsychosocial model of hazardous drinking and alcohol use disorders"

Alberto Fernando Oliveira Justo

Potential competing interests: No potential competing interests to declare.

The authors raise an important issue in the context of alcohol use disorder, underscoring the need to analyze the psychosocial factors that contribute to this condition. The manuscript under discussion emphasizes the biogenetic aspects of alcohol use, but decades of research have shown that psychosocial factors play a crucial role in the development and maintenance of alcohol use disorder. Therefore, the authors call for greater attention to be paid to the psychosocial factors that underlie alcohol use disorder, in order to inform more effective interventions
