# Phosphatidylinositol N-Acetylglucosaminyltransferase Subunit A

National Cancer Institute

## Source

National Cancer Institute. *Phosphatidylinositol N-Acetylglucosaminyltransferase Subunit A*. NCI Thesaurus. Code C95927.

Phosphatidylinositol N-acetylglucosaminyltransferase subunit A (484 aa, ~54 kDa) is encoded by the human PIGA gene. This protein is involved in the mediation of glycoposphoinositol anchor synthesis.
