

Review of: "Communicating Cutting Edge Research on Physiological Networks: A Three-Step Method"

Sreeja Rajesh

Potential competing interests: No potential competing interests to declare.

The author provides a comprehensive overview of the research process undertaken by the science communicator and the subsequent steps in the process. Utilizing both a science journal and TikTok aligns well with diverse audience preferences. The choice of TikTok for dissemination is innovative, but more specific details on the content strategy would be beneficial. While metaphors and examples are mentioned, their integration could be improved to ensure they effectively enhance understanding without sacrificing accuracy. More specific details about the short animations, criteria for evaluation, and how they align with Calmecac's communication goals can be included.

Recommendation: Can be accepted with some minor revision
