

Review of: "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Pavana Kumara Bellairu

Potential competing interests: No potential competing interests to declare.

- Article is written well but needs still more refinement in terms of language. Also needs to be improved in terms of readability.
- Results need to be analysed properly, giving the inference of the results rather than just reading them.
- What made you select these natural fibers for reinforcement? Explain with gap identification.
- Author can look into the conduction of statistical analysis for better understanding, as given in <https://doi.org/10.1108/MMMS-05-2020-0122>, <https://doi.org/10.1007/s12221-022-4213-1>
