Potential competing interests: No potential competing interests to declare.

This is a concise, informative paper that gives a good overview of the current trends in using AI in healthcare and their possible ramifications. It deserves to be published, but I would like the author to modify and/or elaborate on a couple of claims that may be a little too strong, and also expand the argument leading up to the conclusion. I have made more precise suggestions and comments in the manuscript, which I have attached (under "Supplementary data").
