

# Review of: "Dopamine D5 receptor involvement in LTP and LTD: adjustment to the dysconnectivity theory of schizophrenia"

Hans-Gert Bernstein<sup>1</sup>

<sup>1</sup> Otto-von-Guericke-Universität Magdeburg

**Potential competing interests:** The author(s) declared that no potential competing interests exist.

The quality of the review is satisfying now (except subchapter 2, where only one reference is provided in support of the hypothesis).

Unfortunately, the reference list was not re-done with regard to my suggestions (i.e., first names of the authors : sometimes full first names provided, sometimes not).
