**Potential competing interests:** No potential competing interests to declare.

These are my comments

1. The topic needs to be reframed WaveBit — Nonbinary Computation: "I " Symmetric Cryptography
2. The abstract should be comprehensive, giving an idea what to look for in the body of the write-up; check for repetition on Line 2 of the abstract
3. Crypt or Crypt?
4. The introduction and literature review were lumped together; for clarity, each should be separated
5. The methodology is well presented with mathematically equations to back them up
6. If equation 5 is not from the authors, it must be referenced.
7. The paper should be accepted with minor corrections
