Potential competing interests: No potential competing interests to declare.

The authors should revise the title of the article as it doesn't exactly express the main content of the paper.

The structure: Introduction, Literature review, Methodology, Results, Discussions, Conclusion is recommended. The authors don't mention the methods used in their research.

Please, update the literature. You are writing "Recent statistics show..." but give the reference of sources published in the years 2017, 2019.

You may also include the stages/ phases of culture shock in your study because the feelings and behaviour of Expatriates can change significantly depending on the stage.

Proofread the paper as there are some punctuation and grammar mistakes.
