Thank you for taking on the important topic of industry - institution cooperation. My comments noted here are an effort to assist you in the publication of your paper. The literature survey is too short and does not provide adequate context for the topic. This survey could benefit from a stronger tie to the literature. The research objectives do not seem to align with the study, and the SWOT would work better aligned with the literature. The research methods should be in narrative form and explain why a case study was the best option for this topic, and the case study procedures need to be better explained. Success factors need some context and the lesson learned section needs more substance. A discussion should summarize the study, but currently, this section is too thin and does not offer any literature references. Same comment for the conclusion.
