Dear Editor,

I read the review article 'Cytomegalovirus Infection' with great interest.

It is summarized quite simply and well. It will be an adequate resource, especially for medical students, general practitioners, and family physicians.

Just for grammar, I will suggest the following change;

\*Instead of the expressions 'small bodies, in children and adults in good health, medical symptoms' on page 4, 'IUGR, immunocompetent, clinical symptoms' should be used.

Yours sincerely,

Eda Kepenekli, Assoc. Prof.

Pediatric Infectious Diseases Specialist.
