

Review of: "Unravelling The Contributions Of The Nigerian Livestock And Other More Prominent Sectors In Mitigation Of Global Green House Gas (GHG)"

JUNE LEVI-OGUIKE

Potential competing interests: The author(s) declared that no potential competing interests exist.

A worthy effort, with some valid and insightful commentary.

However, it is not immediately clear if the manuscript is intended as a report, book, or an original research article or academic paper. The overall structure of the paper needs to be revised to suit the desired or required format.

Due citations and relevant sources for some sweeping statements are lacking. Kindly cite verifiable and reliable sources and provide clear definitions or metrics for words such as “infinitesimally”.

Some typographical and grammatical errors also need to be addressed.

Overall the subject matter is reasonable and valid, however, the author needs to restructure the title and entire manuscript, by identifying the target audience and key thrusts of the article, in order to structure and revise it accordingly.
