

Review of: "Sustainable futures: a quality-focused model for inclusive knowledge co-production"

Supriya Kumar Ghatak

Potential competing interests: No potential competing interests to declare.

Overall, the topic is interesting, described nicely; however following revisions are recommended to improve the clarity of the paper:

1) Proper supporting reference is missing in the first paragraph of introduction.

2) The meaning of the following sentence is not clear:

"Since time immemorial, economic and development theorists across the globe have underscored the importance of education for socio-economic inclusion and development (Alexander, 2020; Findlay & Kierzkowski, 1983; Oyinlola and Adediji, 2021); Singh, et. al., 2022)"

3) The research objective and the research scope is missing in the introduction section

4) The authors need to elaborate the necessity of using the Distributed Cognition Theory

5) A 'Background Study' or 'Literature Review' section is missing in the paper.

6) Research gaps or research issues should be explicitly mentioned before proceeding to the theoretical framework

7) Please explain how 'Methodology' is coming after 'Output'.....

8) The cases should be discussed in a more structured manner.

9) Findings should be discussed under different sub categories with respect to theoretical contributions and managerial contributions

10) Proper use of punctuation is missing in many of the sentences.
