

# Review of: "Using Taxes to Attract the Creative Class in the Presence of a Region-Specific Rent"

Haixia Shi

Potential competing interests: No potential competing interests to declare.

On the basis of the existing literature research blank, this paper studies how the existence of a region specific rent affects the efficacy of tax policy in attracting creative class members to a particular region. By establishing a theoretical model, this paper deduces the research conclusions. The research problems are clear, the process is rigorous, and the conclusions are in line with the reality. In the future, the model can be extended from static to dynamic for research.
