Review of: "Deconstruction of Gender Dynamics and Its Implications for Gendered Inclusive Design: Application of Urban Big Data and Interpretable Machine Learning Method in India"

Soumi Muhuri[1]

1 National Institute of Technology, Rourkela

The objective of the research is good. The research has identified a very interesting methodology. However, the method of capturing data (for example crime data) has not been revealed. Further the result is not being discussed thoroughly. The author should discuss how the result of this study deviates or in line with earlier studies.
