Manuscript title: The antibacterial activity of *Allium sativum*, *Thymus vulgaris*, *Origanum vulgare*, *Curcuma longa*, *Rosmarinus officinalis*, and *Cinnamomum* species against various antibiotic-resistant strains of bacteria: A Literature Review.

1. Introduction:

1.1. A Brief History of Antibiotic Resistance

- This section should be supported by additional relevant citations.

1.3. Statistics Related to Antibiotic Resistance

- Page 3: The species name "S aureus" should be written as "S. aureus".
- Page 3: The species name "S pneumoniae" should be written as "S. pneumoniae".
- Page 3: The species name "P aeruginosa" should be written as "P. aeruginosa".
- Page 3: The species name "E coli" should be written as "E. coli".
- Page 3: The species name "C jejuni" should be written as "C. jejuni".

1.4. Herbal Treatment for Antibiotic-Resistant Bacteria

- This section should be supported by relevant citations.

3. Methods:

- A dot (.) should be placed after the abbreviated genus name in the species names. Please, apply this concept in all positions.

- Table 1: Insert a new column under the title "References" to support the reported data.

7. Natural Medicine Approach to Bacterial Infections

- The reported phytochemicals as well as their chemical classes should be summarized as in the form of pie chart.

11. **Conclusion:**

- The conclusion should be supported by the results.

Abbreviations:

- A list of abbreviations should be added.

References:

- The species names should be written in italic fonts.
