

Review of: "A Simple Preprocessing Method Enhances Machine Learning Application to EEG Data for Differential Diagnosis of Autism"

Priya Mohan

Potential competing interests: No potential competing interests to declare.

1. In your abstract, you missed the statement of the problem; please include it.
2. The following sections were copied: Introduction, Literature Review.
3. It is suggested that the author mention mathematical formulas for Accuracy (%), Sensitivity (%), and Specificity (%).
4. The authors have to check grammatical mistakes before submitting to the journal.
5. The authors have to advise to mention geometrical representation of the neurodevelopmental disorders so that other people can easily understand instead of the theoretical part.
6. It is advised that authors mention signs and symptoms of autism spectrum disorder (ASD) in the literature and also suggested to refer to recent publications so authors can add some more literature in the corresponding section.
