# Aloe/Anise/Ascorbic Acid/Clove/Peppermint/Spearmint/Thyme-based Mouthwash

National Cancer Institute

## Source

National Cancer Institute. *Aloe/Anise/Ascorbic Acid/Clove/Peppermint/Spearmint/Thyme-based Mouthwash*. NCI Thesaurus. Code C107501.

A herbal-based mouthrinse containing aloe, anise, ascorbic acid, clove, peppermint, spearmint and thyme, with potential anti-mucositic activity. When aloe/anise/ascorbic acid/clove/peppermint/spearmint/thyme-based mouthwash is used as a rinse, the ingredients in this agent may prevent or decrease inflammation and bacterial infections. This may prevent or inhibit radiotherapy- or chemotherapy-induced mucositis and decreases the pain associated with mucositis.
