

# Review of: "Analyzing the nexus between Spatial Data Infrastructure Development and e-Government"

Hung-Wen Chang

Potential competing interests: No potential competing interests to declare.

1.It is recommended to add a flow chart to illustrate the research methods and process.

2.A very important point in a research paper is to make a contribution to the academic literature or have new insights. Unfortunately, this paper lacks this part of the research results.

3.It is recommended to add some interviews with experts and scholars or questionnaire analysis to increase the credibility of this paper.
