## Comments

I have reviewed the manuscript. The manuscript can be accepted after some corrections are made by the authors. I am submitting my comments & suggestions about the manuscript, which are as follows:

1. In the abstract, methods should not be used; only focus on your results with a short background.
2. In the manuscript, there is repetition of results in the text after tables 3, 4, and 5.
3. The introduction is very long; it should be concise and specific.
4. In the discussion portion, first discuss your own results, rather than start with previous studies and then correlate them with your own results.
5. Please format the references perfectly according to the journal's guidelines.
6. There are many spacing mistakes in the manuscript; correct them.
