## Building Design Parameters for the Safety of Individuals with Autism Spectrum Disorder

### Abstract

1. Written not in an abstract format.
2. The using of the term is not consistent. (individuals with ASD, individuals with Autism & individuals with Autism Spectrum Disorder). Please use only one.
3. The methodology of this research paper aims to study... (comment: the methodology is not the aims of the study)

### Introduction

1. Figure 1 – what is the different between crime and criminal?
2. Avoid sweeping statements (examples): where are the sources/ references?
  - i. Globally, there are about 1000 million persons with disabilities, or around 15% of the world's population, or one in every seven people.
  - ii. Between 110 million to 190 million of these individuals struggle significantly with daily functioning.
1. 3.1 and 3.2 – too brief, but with strong headings.

### Overall

This article seemed to be not a research based article, its more to SLR (Systematic Literature Review) but it also did not meet the actual SLR format of writing.
