Review of: "A Master Equation for Screening in Luminal Horndeski Gravity"

John Bayron Orjuela Quintana[1]

1. Department of Physics, Universidad del Valle, Cali, Colombia

Dear Sergi,

Thank you for the update. I would like to congratulate you on the revised version of the manuscript and, of course, on its publication in *Physical Review D*. This is an excellent outcome and, in my view, a strong recognition of the quality and relevance of the work.

Best regards,

Bayron
