Potential competing interests: No potential competing interests to declare.

1. The research purpose is clear.
2. There is a lack of theoretical underpinning in the study, and the theoretical contribution is weak; the theoretical contribution needs to be clearly stated.
3. The moderating variable (gender) in the study is better analyzed using multi-group analysis.
4. The control variables in the model need to be represented so that the robustness of the model can be improved.
