Behaviour Change Intervention Ontology (BCIO)

Source

[Behaviour Change Intervention Ontology \(BCIO\)](#)

Definition: An individual human behaviour that involves a person contributing to the functioning of a social structure or a person in relation to a social structure.

Comment: In the definition, the term 'contributing' can refer 'joining or integrating into a group or improving or maintaining the functioning within a group' 'social structure' can relate to a social network or group.

This definition was imported from the Behaviour Change Intervention Ontology (see <https://bciosearch.org/>). Comments and suggestions for improvements are welcome using the Qeios review system.

Definitions imported from the Behaviour Change Intervention Ontology (BCIO) are what are known as 'ontological definitions'. See this article in Qeios for an explanation <https://www.qeios.com/read/YGIF9B>.

Ontological definitions can sometimes be hard to read. In those cases we also include an informal definition.

Definitions also often require elaboration to make it clear how they should be used and what they include. In those cases we include a comment.

Also, definitions sometimes require an explanation as to how they came about to help users understand how they relate to alternative definitions. In those cases we include a curator note.
