Genomics and Proteomics Shared Resource

National Cancer Institute

Source

National Cancer Institute. *Genomics and Proteomics Shared Resource*. NCI Thesaurus. Code C39412.

The Genomics and Proteomics Shared Resource is an integrated resource that provides genomic and proteomic technologies to the Cancer Center investigators for basic and clinical research applications including DNA and RNA isolation, DNA sequencing, serial analysis of gene expression library production, SNP genotyping, ST RP genotyping, microarray analysis, quantitative RT-PCR, protein identification and sequencing and profiling.
