## Comments

1. The author's introduction was very nice and understood easily.
2. In Figure 1 the contents was too small, if possible enlarge little bit, then we can easily viewed.
3. You need to mention from where you get this *strain Amorphotheca resinae*
4. In Biodetoxification and Pretreatment with Dry Acid assay you use some acids and there you should write the concentration you have taken.
5. Figure 2 was not clear, paste clear image.
6. Need to add some more live pictures.
